

Downloading eBooks to your Kobo eReader

Step 1: Use the USB cable that came with your Kobo eReader to connect it to your personal computer. If a window does not open to launch the software install, open the Kobo eReader as a drive in “My Computer.”

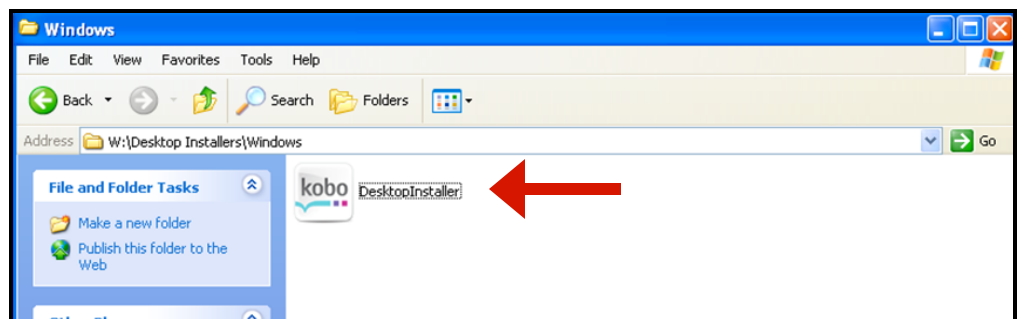

Step 2: Click on the “Desktop Installers” folder.

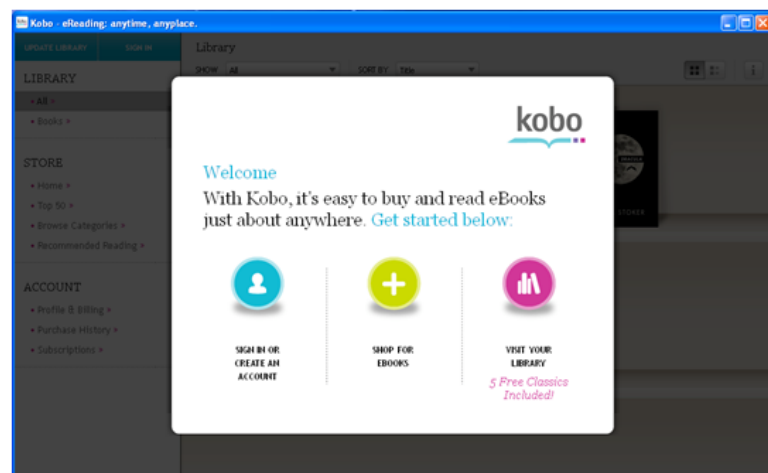

Step 3: Click the correct folder for your computer— Mac OS X or Windows for a PC.

Step 4: Click on the Kobo “DesktopInstaller” to begin the downloading process.

Step 5: Once the Kobo software has finished downloading, it will launch. You can “Sign In or Create An Account” at this time, but this is not required to borrow books from your library. Close this window once you are finished.
